(* See Legend at end for Priority and Status Codes)

Item # (Use CAIRS Incident ID # and Incident Date)	Priority	Action Plan (Actions Taken/Need to be taken)	Assigned To	Follow up: Date Pending	Status
127619-21/04/29	C	<p>Finger Cut Incident</p> <p><u>June 2021</u>: Report status update not available due to KP not being present for this meeting.</p> <p><u>May 2021</u>: An employee was walking by and scrapped/cut their right finger on the sharp metal corner of a wall protector plate.</p> <p><u>Corrective Action</u>: A service request for a silicone protector to be added to that metal plate will be put in and the report will be updated accordingly.</p>	KP	21/07/15	IP
127678-21/04/19	E	<p>Racks in the Window Area Incident</p> <p><u>June 2021</u>: BC and KP are still looking into ways to temporarily lock the wheels of the racks.</p> <p><u>May 2021</u>: An employee experienced pain in the right shoulder and back due to the repetitive moving of heavily loaded racks in order to access items on them.</p>	KP/BC	21/07/15	IP

5. REVIEW CAIRS REPORT OF ACCIDENTS/INCIDENTS					
		<p><u>Corrective Action:</u> It was suggested to lock the wheels of the racks to prevent them from moving, but those racks are supposed to move. Employees were trained how to properly move the racks and are also reminded frequently not to move the racks due to them being heavily loaded. The racks are not permanently locked because custodians need to clean beneath them. It was then suggested to put a boot on the wheels of the racks, which will both temporarily lock them in place and also allow them to be movable so that custodians can clean underneath them. The report needs to be updated with more information.</p>			
127738-21/06/02	E	<p>Finger Cut Incident <u>June 2021:</u> A student received a superficial cut to their right finger due to not being appropriately careful whilst cleaning a cryomicrotome blade. <u>Corrective Action:</u> Re-emphasize and remind the need to be careful when cleaning blades. Brushes and other tools (e.g. tweezers) that are available should be used when holding and cleaning the blade as opposed to manually holding and cleaning the blade.</p>	KP/LH/NF	21/06/17	C
127757-21/06/01	E	<p>Patient Abrasion Incident <u>June 2021:</u> A child patient grew agitated during a dental sedation procedure and pinched and scratched a staff's right wrist and left arm. <u>Corrective Action:</u> Investigation regarding the incident is still under way.</p>	KP/KM	21/07/15	IP
127766-21/06/08	E	<p>Patient Kick Incident <u>June 2021:</u> A difficult child patient kicked a staff's right shoulder and right arm area during an oral dental sedation procedure. The staff felt heaviness and a sense of tingling in their arm area after the incident. <u>Corrective Action:</u> Reviewed corrective measures to take while supporting/assisting the dentist with patients under oral sedation and making use of mechanical restraints vs. manual restraints. Finding out more info regarding patient restraint procedures/protocols in order to prevent similar incidents via speaking with the supervisor in charge.</p>	KP	21/07/15	IP

The membership list has been updated by IE. There are no changes to the ToR other than the dates. The FoD annual incident report has been tabled and trends/stats are similar to last year. Inspector suggested two options: put a radiation dosimeter badge on the wall to monitor the leakage of radiation or go back to the original 2006 room design documents to see if the room is adequate for the new machine. However, neither the dosimeter nor the room design documents are available. AE will inquire about the specifications of the room and copy BC and will also contact the BDCA regarding how to obtain a radiation dosimeter badge for the room.</p> <p><u>April 2021</u>: The radiation inspector will arrive sometime in May to do the final site assessment regarding the new CBCT machine.</p> <p><u>March 2021</u>: BC will check with LX to ensure that the final site assessment has been completed.</p> <p><u>February 2021</u>: Final site assessment of the room shielding still needs to be done. BC will follow up.</p>	BC/NF/AE/LX	21/07/15	IP

The SRS is asking the Committee to communicate with the undergrads to un-enroll from that chem course and then to enroll in an entry-level lab safety course instead. PJ will send the Committee an e-mail regarding this issue.</p>	PJ	21/07/15	IP
